Bellette, the well-known publication of Edna Hyde McDonald, is a clever compilation of various types of writing - news, personal opinions, verse, etc. It is always a treasure-house of information of interest to all amateurs. The editor writes what she pleases, and pleases those for whom she writes. Sometimes she is a little risqué, but the sense of humor is dominant - a real saving grace.

Tattooed Crook: All of the CR-5 members have the organization's name carved onto their skin somewhere. The same applies for GD members. Whenever the members switch allegiances though, they have to burn off the former tattoo with a cigarette.

The first issue under the Thrift & Harwood management appeared in December, 1901. It contained thirty-two pages of text and eight pages of advertising. The second issue appeared in February, 1902. It was the straw that broke the camel's (our) back. To hand-set and print a magazine of this size and deliver 5,000 copies bi-monthly proved too great a task for us. We had the choice of devoting our time to publishing and forgetting that we were attending an institution of learning, or vice versa.

Printing and publishing are in our blood. We admit it and we're not ashamed of it. In fact, we are glad that we have something creative to serve us in these days when it would be so easy to let worry and fear of the future get one down.

Personality Blood Types: Revealed in the visual fan book. As might be expected, all of the characters fit the personalities associated with their blood type (Bernardo: A, Ivan: B, Giulio: AB, Gian and Luchino: O). The only apparent exception so far is Bakshi (AB).

## **CONSECUTIVE serial numbers, 1986 BANK OF CANADA TWO 2 DOLLAR NICE BILLS**

Fear Is the Appropriate Response: Played for Drama in Giulio's route. After Gian finds Giulio soaked in blood and surrounded by the mutilated bodies of his foes, one of his options is to run away immediately in response. Or try to, anyway, since Giulio won't actually let him leave.

The Mafia: The CR-5 is based on a fictional Italian crime family known as the Toscanini Family. However, it doesn't follow the proper family structure since there's no underboss and only five caporegimes (hence the name).

Improbable Infant Survival: Played straight in Gian's backstory, where he was the only one left alive (as a young child) in the aftermath of a drug addict's rampage that killed both of his parents. Averted in Ivan's route where a prepubescent girl swallowed insecticide to kill herself after watching both her mother and grandmother hang themselves. Her rotting corpse is accidentally discovered by the main characters, which triggers one of them to snap violently.

Out of Focus: Happens to all of the other main characters after Gian enters a specific character's route in the third part of the game. This is after they all receive a fairly equal amount of plot attention for the first two parts. Bernardo tends to show up the most in the other routes, though.

## **Plastic & Rubber Dummies**

Accidental Aiming Skills: Gian gets one moment of this in Luchino's route, when he fires a single round while aiming at the GD members attacking them and manages to hit the fuel tank of their car instead, causing it to leak underneath their feet. He then flicks a burning cigarette at the puddle for predictable results.

In the meantime we had been drawn back into the influence of amateur journalism through Falward Cole, the Boston convention, and other contacts. This renewed interest prompted us to get out a "Reminiscence Issue" of The Lucky Dog in 1940, to be followed by other issues in 1941 and 1942.

Gray Rain of Depression: At the end of Bernardo's route, Gian finds him standing alone in a downpour outside the bar where his former girlfriend is currently singing, while holding a bouquet of roses. Nonetheless, after Gian encourages him to leave and move on, this trope quickly transforms into Caught in the Rain.

As we stated was our intention, we have recited these incidents in publishing during several business connections to show the influence of amateur journalism all through our business life. Of course publishing naturally fitted into our advertising activities, but the groundwork we laid in amateur journalism and in publishing The Lucky Dog and The Black Book undoubtedly helped us considerably when later ventures came along.

Cool Car: The sleek red Alfa Romeo that the gang steals from the warden at the end of the prison breakout. Also, Ivan's white Mercedes counts in his route, which he eventually blows up at a harbor to wipe out a group of GD members using some dynamite and a wad of gum.

Cutting Off the Branches: Averted. None of the routes in *Lucky Dog 1* are declared canon (since they're all self-contained). In fact, the Spin-Off *Lucky Happy Life* avoids this by depicting Gian paired with no one in his personal route, or in the manga adaptation.

Itso happens that this 1943 issue of *TheLucky Dogis* made possible because, by devoting evenings, Sundays, holidays andour vacation to *TheAonian*,we have gotten so far ahead of our schedule that we have severalmonths at our disposal to do something else. And perish the thoughtthat we should live with a complete little printing plant and see itstand mute and idle!

Every Car Is a Pinto: The cars in this game tend to blow up frequently. Justified in Ivan's route though, after he and Gian left a bundle of lit dynamites inside the car.

That's our focus and we do it extremely well. The app teaches the Korean "alphabet" Hangul (hangoul) too!

Ruthless Foreign Gangsters: The American gang, Grave Digger. In fact, even though the setting is in the United States, Daivan itself is shown as a city overflowing with immigrants which has been under the Mafia's control for some time now which is why GD is seen as foreign compared to CR-5.

The reason why human beings are not alone on the earth is because there are countless animals accompanying us. Animals are so important to the earth because animals, like humans, are part of the earth. There are countless kinds of animals on the earth. According to the statistics of zoologists, there are currently about 1/5 million known animals on the earth. According to the opinion of taxonomists, this number still does not reach the actual number of species, which means that there are still many animals that have not been discovered.

Finish Him: In the second part of the game, Luchino gives Gian a gun and tells to finish off a traitor they've just tortured after getting enough information from him. Gian can either pull the trigger himself or wink at Giulio and let him do the job.

VolumeTwo, Number Two, of *TheLucky Dog*,published in June, 1901, was forty pages. Aside from many hours ofhand composition, it represented 10,000 impressions on a 5 x 8hand-power press (Kelsey).

Token Mini-Moe: Rosalia Cavalli is the only female character with an actual design and portrait in the game. She also happens to be a pubescent.

You Taste Delicious: In Giulio's route, Giulio licks ice cream off of Gian while they're in bed at one point. He even

outright says Gian tastes delicious in the midst of doing so.

Foreshadowing: Ivan's route spoils its true ending on the first day by showing the final scenes and Ivan's thoughts about the friend he once had long ago—Gian. It's shown completely out of context though, meaning it probably won't make sense to a first-time player unless they were already spoiled beforehand. Averted in Ivan's second good ending, though.

The color suits the title, *The Flirt*, published by Eleanor C. Nelson of Evanston, Ill, and printed in the Brodie shop by Helm Spink. The September number has a nice little account of the editor's part in the Columbus convention. It conforms to the feminine viewpoint - now, in the past, and, we are sure, in the future - by giving glimpses of what "he" did and said and "she" did and said.

Set in 1930s America, it's about a particularly hot Mafia group called the CR-5. At the beginning of the game, they're stuck in prison, until the protagonist, Giancarlo Bourbon del Monte (mostly known as "Gian"), finds out that he can become the CR-5's boss if he manages to break them all out successfully. With his cohorts Giulio di Bondone, Ivan Fiore, Bernardo Ortolani and Luchino Gregoretti, he (hopefully) makes it out of prison intact, and to his hometown known as Daivan. The plot then chronicles his life with whatever character you choose to pursue, and whether or not Gian makes it into his position or not.

After running the private printery for a time, we secured a job as Editor of House Organs for The

Sherwin-Williams Co, the “Cover the Earth” paint and varnish people. There we edited three monthly magazines – for dealers, employees and architects. Later, with Finley, we got out The Commentator for his chain of restaurants. It was in 1910, however, when we went with The American Multigraph Sales Co. (where we stayed for sixteen years), that our real publishing career began. There we edited, for the sixteen years, a weekly sales organ called The Ginger Jar; and, during a portion of that time, another publication, a monthly, called The Layman Printer, for Multigraph users.

Brown began his television work with three sixty-minute specials produced over two years.

The magazine had a paid circulation of 10,000 and carried a large volume of advertising. It was largely instrumental in breaking down our health at one time, as for some years we conducted its editorial work and correspondence from an office in our home (after regular business hours), and the continuous night work finally laid us low. In addition to these publishing ventures, while with the Multigraph we got out several books and series booklets, mostly designed as educational matter on direct-mail advertising. One exception was a book, “Man-To-Man,” by John Leitch, which was the first treatise on “Industrial Democracy,” and widely read in the period of the first World War. The story of its inception and development is most interesting and has never been told, but it is too long for inclusion here.
