If you've caught your breath, and have decided that you may not have to spend all 4 years of high school in pursuit of Calculus credit, I want to offer you some alternative math courses that you can use in place of the traditional sequence we discussed earlier. Using applied math takes the "theory" of math, and puts it into "application" or real-world use of numbers. For many students that struggle with math, you'll see a huge improvement when they begin studying applied math- this happened to my 12th grader. After struggling through 3 years of Saxon Algebra 1/2 (aka pre-algebra) with barely passing marks every year, (yes, he did the same book 3 years in a row and it never "clicked" for him) my 12th-grade son is now a solid "A" math student in Consumer Math. He has turned the corner, we found a way for him to be successful! I only wish I'd started him in applied math years earlier.

This book, the first of two volumes, contains over 250 selected exercises in *Algebra* which have featured as exam questions for the Arithmetic course taught by the authors at the University of Pisa. Each exercise is presented together with one or more solutions, carefully written with consistent language and notation. A distinguishing feature of this book is the fact that each exercise is unique and requires some creative thinking in order to be solved. The themes covered in this volume are: mathematical induction, combinatorics, modular arithmetic, Abelian groups, commutative rings, polynomials, field extensions, finite fields. The book includes a detailed section recalling relevant theory which can be used as a reference for study and revision. A list of preliminary exercises introduces the main techniques to be applied in solving the proposed exam questions. This volume is aimed at first year students in Mathematics and Computer Science.

Command & Conquer became synonymous with real-time strategy gaming when the very first *game* in the series was released in 1995. Yeah, we can all remember the high points like Tiberian Dawn(1995), Red Alert(1996), Tiberian Sun (1999), Red Alert II(2000), and recent Renegade (2002). Now, the real-time strategy genre comes back with Generals in full 3D. This is the first 3D C&C RTS *game*, and in fact, the first one with a totally new engine. Contrary to what others say, the move from the traditional 2D to 3D is a welcomed move for me and many other RTS fans of the C&C series. The C&C series being 2D was a great series already, but making 3D just blows me away, especially for a *game* this beautiful. So, can Command and Conquer: Generals live up to the standards set by its predecessors?

Dual\_EC\_DRBG, was favored by the National Security Agency. Dual\_EC\_DRBG uses elliptic curve technology and includes a set of recommended constants.

Red Alert plays around with time in more ways than one. It's the follow-up to the fabulously popular Command & Conquer: Tiberian Dawn, but the events in Red Alert actually occur before those in the previous game. It's a prequel rather than a sequel. The new full-motion-video cut scenes unfold a storyline that explains the world situation that led to Tiberian Dawn's conflicting GDI and Nod forces. The plot revolves around Albert Einstein. A grief-stricken Einstein, attempting to prevent World War II and the Holocaust, discovers a time machine and assassinates Hitler before he rises to power with the brown-shirts of Munich. With Hitler out of the way due to Einstein's time manipulation, the Nazis never rise to power, and World War II as we know it never occurs.

## common denominators in algebra

Emperor certainly looks the part. The game comes dressed up in all the expected full-motion video accoutrements that Westwood has been using since it was still acceptable to do so, in the middle 1990s. Like Red Alert, the plot is detailed in lengthy, gaudy film clips featuring a number of professional actors. Some are recognizable stars, such as the aforementioned Michael Dorn of Star Trek fame, while others are nobodies, but they all share the same uncanny ability to chew the scenery. Almost every scene has a few unintentionally hilarious moments, due to hammy acting, poor scripting, or a combination of the two. Everything is rendered even more ludicrous by the way that the actors address the gamer directly, breaking the fourth wall during mission briefings to inform the player that, yes, all is riding on what he or she is about to do. This isn't any more effective here than it is in the Red Alert games. The video sequences are so unlike the actual game that you have to make a conscious effort and remind yourself that the two are supposed to be related. Most of the time, however, you'll just sit back and gawk at how much better Michael Dorn looks without that rubber turtle on his

head.

You've heard me tell you that YOU are the best guidance counselor for your teen. That extends beyond math, obviously, but I'm not going to tell you whether I think it's right or wrong to push your non-mathy teens into Calculus, that's for you to decide. In this post, we're going to embrace the possibility that some of our teens don't enjoy math - have no interest in STEM - want to study as little math as possible, and certainly, don't want a career that requires a lot of math. It is possible to lead a happy, healthy, educated life without loving math.

For example, the Algebra 1, Algebra 2, Geometry, and Pre-Calculus Teaching Textbooks™ contain far more multimedia teaching than the nearest competitors' products. Third, because the Teaching Textbook™ series was designed for independent learners, it introduces proper terminology only after first presenting the underlying concept in plain.

As is par for the course, you build a base, harvest ore, expand your borders and kill the unending trickle of enemy units until you overrun their base, all with scant regard for tactics - been there done that, we all have. With that in mind, what has been baffling me is why I enjoyed Red Alert 2 so much and yet could not derive any pleasure from Tiberian Sun. Both games are practically identical in structure, offering similar units to play with across a linear series of missions, liberally interspersed with high-quality video sequences. The only answer I can offer is a subtle difference in feel and mood. Where Tiberian Sun was a dark and faintly absurd yarn full of square-jawed heroes and boo-hiss villains, Red Alert anti its illustrious predecessor are somehow believable, despite being even more outlandish.

On the other hand, if you're unsure whether you still have the stomach for the series' roots, I wouldn't blame you for dipping your toes into a freeware version of Red Alert, currently available as either a full install of the original **game** or a multiplayer-only fork, before shelling out for this one. But this is one of those occasions where EA has done the right thing and offered the community a full open source path to the games' original code, should that compel you to pay for the package due to principle, as opposed to your RTS preferences. Really, so much of this package bucks Ars' assumptions about EA as a modern **game** publisher: a return to a beloved franchise, built in part by its original staff, that has prioritized fan feedback and its hardest-core fans at whatever cost. That makes the collection's launch-week issues a little easier to swallow.

After finishing the game for the first time, I began a fresh save on Hardcore difficulty to see if it scratched that itch, and I was not disappointed. It only takes a swing or two from an enemy to go from full health into the red, leaving a lot less room for error when it comes to getting hit. Playing it safe, learning the right time to dodge, and running about a hallway or so back from a threat to give yourself distance becomes mandatory even with weaker foes. It's not that it's hard; it's that the game asks you to put your all into every encounter and always be alert -something that I never quite felt on Standard since damage from enemy hits was laxer.

GENERAL EDUCATION: the core requirements everyone at that college must take in order to graduate from that college. General Education requirements are as few as 5 classes in some Associate of Applied Science programs, to the more typical 20 courses at a 4-year college. You'll find that General Education requirements can be VERY different from one school to the next.

Tom Walker, Salinas, CA Thank you very much for your help! The program works just as was stated. This program is a priceless tool and I feel that every student should own a copy.

The Command & Conquer series comes to us from Westwood Studios, creators of the well-received role-playing titles Eye of the Beholder, Lands of Lore, and Legend of Kyrandia. The series actually began with the 1993 release of Dune II: The Battle for Arrakis. Both C&C: Tiberian Dawn and the new C&C: Red Alert are evolutionary products of the Dune II game engine. Tiberian Dawn has recently appeared on the Sega Saturn and Sony PlayStation platforms, and has spawned an excellent mission disk called Covert Operations. Now that Red Alert has shipped, Westwood plans to start work on the sequel to Tiberian Dawn, to be named Tiberian Sun. Westwood included a brief full-motion-video sneak preview of Tiberian Sun with the Covert Ops mission disk, and showed that the sequel will probably include Mech-style battle suits.

The changes in these books are a little more mixed. They have improved some things and added a few lessons on various topics. The only major change that we don't like, is the addition of calculator problems. They have also removed the trigonometry and logarithm tables because they can be found with a calculator. It is better for students to go all the way through the math course before starting to use these aids. When using later editions, at the very least calculator use should be confined to those problems for which it is absolutely necessary. It can be virtually eliminated by obtaining a set of trig and log tables. These can be readily printed off the internet.

High School Math / Practical Math: This isn't applied math, however, it's a perfectly acceptable math course title if you've decided to dedicate more time to arithmetic. Keep in mind that your teen's real education is more important than what appears on their transcript, so if you see gaps in their skills, ignore the criticisms and do what needs to be done. A community college accepts all high school graduates at every level of mathematics ability.
